Half the size of the original 321 systems speakers, Boses patented Gemstone speaker array works in concert with the systems TrueSpace surround processing to deliver a spacious, multichannel

presentation from just 2 visible speakers and a hideaway Acoustimass module. Using Bose TrueSpace proprietary digital processing circuitry, the 321 GS.II system improves the sense of spaciousness imparted by stereo recordings and exciting movie effects from Dolby Digital and DTS surroundencoded materials. Yet its few parts require little effort to set up, so you can enjoy your new systems performance right awayit even comes with a helpful system setup and demo disc. Progressive scanning, referred to as 480p for the number of horizontal lines that compose the video image, creates a picture using twice the scan lines of a conventional DVD picture, giving you higher resolution and sharper images while eliminating nearly all motion artifacts. Proprietary Videostage 5 decoding circuitry goes beyond conventional digital technology to bring new life to old movies and music. It gives you a surround sound experience from practically any source, including older media such as videotapes, stereo CDs, even mono TV programs. Advanced postprocessing techniques automatically deliver a clear, onscreen audio center image and balanced surround sound, similar to that of a 5.1encoded DVD. In the Bose Acoustimass module, 2 downwardfiring drivers give you powerful performance for the lowest audible notes and effects. And proprietary Bose technology ensures that you hear with clarity the proper balance of deep lows from all channels for music and movies. Hide the module almost anywhere, even behind furniture, and all the sound seems to come from the small cube speaker arrays. If you have other Bose hardware already in placea Wave music system, a 321 Series II DVD system, or a Lifestyle systemyou can hook it up to this 321 GS.

II system using an optional 50foot Bose link B connection cable to extend your entertainment to an additional listening area. You can also expand upon the 321 GS.II system later by integrating it with a Lifestyle system. Note Bose recommends that you maintain at least 3 feet 1 meter of space between the 2 speakers with no more than 3 feet 1 meter between each speaker and the edge of your TV screen. Amazon calculates a product's star ratings based on a machine learned model instead of a raw data average. The model takes into account factors including the age of a rating, whether the ratings are from verified purchasers, and factors that establish reviewer trustworthiness. Please try again later. Fabio Arturo Penaranda 4.0 out of 5 stars Had heard it displayed in Bose store. At home, hooked to my new home theater system, it blew me away!!!! I cant get enough of it. I have a 1400square foot home, open floor plan and it more than fills the space. Get the dandy floor standsThe equipment even though many years old, was in good working condition.
