See full review Is It Worth it. Onsite Associates Program Amazon calculates a product's star ratings based on a machine learned model instead of a raw data average. The model takes into account factors including the age of a rating, whether the ratings are from verified purchasers, and factors that establish reviewer trustworthiness. Please try again later. DaMann 3.0 out of 5 stars It doesn't get any better. This SoundDock could fill a room with clear notes across the spectrum while charging my iPod at the same time. The only issue I ever had with this product was the one that caused it to break in the end. The docking pins were too fragile and subject to bending and it was a challenge to line up my iPod properly.

<http://www.drupalitalia.org/node/78280>

I'm not sure if there was any way to improve the design considering the iPod's charging design, but this was a big issue for me and the reason my SoundDock sat broken and unused for so many years

before we finally got rid of it. For the money, it didn't last nearly long enough. Just get a bluetooth adapter and save some cash. I ordered a used one that was described as in "acceptable" condition. Well I couldn't find a flaw and everything worked. The only problem with these is that the connection can be a bit temperamental when you first connect the iPod to the dock. Just make sure it is secure and wait about 10 15 seconds. I worried that since it is a used product that the dock would be worn. So to avoid wearing it out I bought the CoolStream Duo bluetooth adapted and just leave it on. Now I control my iPod from where I am sitting. Being such a small speaker you are not going to get house shaking bass but you do get a very even and clear sound at a decent volume. Recommended. I needed some speakers to use with my iPod. Browsing Amazon I came across this product. It is great. The sound is good, the loudness is right for the room I work in and at least the iPod can be charged as well. The age of the iPod means that the battery is not lasting as long as it used to. So having this Bose system works well to keep the longevity of this gadget alive. It was more money on speakers than I would have initially paid out for but, the brand, and the system itself was worth it. And of course being gentle with the system when using it is also essential. Especially the pin for the connection. It was packaged well, I didnt have to wait too long for it to be delivered, and all round I am happy with the purchase. I got it for my husband because he loves music and he uses it everyday after I leave for work. The Bose is still booming when I get home. The sound is incredible and gives a wonderful feeling. Best thing I could of ordered. I am very happy I got the Bose SoundDock.

<http://askueandco.com/images/car-book-manual.pdf>

The sound quality of this one is 100x better than my other more expensive docking station. Should always go with the Bose from the beginning, IMO I tolerated the power cord getting hot. Many times I had to completely disconnect the power cord from the device and the outlet to get it to work. It finally stopped working altogether this week. Honestly I cant believe how tinny and weak the vast majority of these systems are. In the sub At the original price I thought this was pretty overpriced even though the sound was nice. At the new price it is much easier to swallow although I really wish theyd drop the original one and just sell the Portable version at the price of the one above. Sound quality is nice and warm with good bass and smooth midrange. The highs are a bit lacking with some material but overall it is a very nice. The Sounddock really does a nice job of filling the room with sound. I dont own any other Bose product because I think they cost too much for what you get, but in this case with the new price drop this isnt a bad deal. Most nonaudiophiles will find the sound very pleasing. Again if your considering a cheaper model try and save up for this one, youll be happy you did. So I basically Bought and never was able to use it. Glad I found one as they stopped selling the sound dock in 2017 Sorry, we failed to record your vote. How to Hardwire an iPod to a Stereo How to Use DVI to Connect a MacBook to a TV Monitor How to Use a Hard Disk for a Samsung DVR Pairing an iPad With a VIZIO TV You can hook up the Bose SoundDock a brand of digital music systems from audio products manufacturer Bose Corp. This could be done with audio or video connectors. However, the manner of TV connection depends on the type of SoundDock used because Bose provides three models of the docking stationoriented brand. You can plug one end of a stereo cable into the music systems AUX IN and the other end into the TV if it has a similar connector, which could be labeled as a headphone jack. The connection enables the TV to play music from the SoundDock system, which is activated by pressing the AUX IN button on the SoundDock remote. SoundDock 10 Video If you have an iPhone or iPod with video capability, you can use the VIDEO out connector on the Bose SoundDock 10 to connect the device to the yellowcolored connector of the TV via a composite video cable. That way, you can watch video content such as movies and television shows on the TV. The SoundDock 10 can also be hooked up to a computer monitor or any other type of display device that has a composite video connector. Other SoundDock Models The original model and portable version of the Bose SoundDock called the SoundDock II and SoundDock Portable, respectively lack the video connectivity of their more advanced sibling.
