The soundbar provides digitally optimized virtual surround sound to provide an immersive experience, while the wireless downfiring subwoofer provides enhanced bass from anywhere in the room. This eliminates the need for unsightly satellite speakers and messy wires. The soundbar has a digital input and Dolby digital decoding for a superior surround sound experience. Various modes are provided for movies and music to deliver the best audio for a particular application. The system even offers a 3.5mm stereo mini aux input for connecting audio devices such as MP3 players. The soundbar is controlled by your current television remote, further reducing clutter and confusion.

Whether you're watching sports, playing games, or just relaxing to your favorite playlist TVee brings every tackle, every sound, and every note to life with clarity and impact. The TVee Model 25 is a "2.1" system consisting of a sleek sound bar and wireless subwoofer that work together seamlessly. The system packs 150 watts total power peak in a compact, easy to install and use system. Installation is simple, with just one cable either digital or analog connection between the sound bar and your TV. Just plug the subwoofer power cord in and it automatically connects wirelessly to the sound bar system. It's just as easy to use because the TVee Model 25 doesn't require an additional remote control. It learns the basic commands of whatever remote control you use; your TV, cable box or satellite box remote. The TVee Model 25 sounds great thanks to leading edge technology. Its optical digital input features Dolby digital decoding and the virtual surround mode is digitally optimized for improved performance. It even has selectable movie and music listening modes to optimize the system for viewing or music playback.

[www.die-umzugsfabrik.com/wp-content/plugins/formcraft/file-upload/server/content/files/1626f6756327ee---bosch-wtl-6401-manual.pdf](http://www.die-umzugsfabrik.com/wp-content/plugins/formcraft/file-upload/server/content/files/1626f6756327ee---bosch-wtl-6401-manual.pdf)

The TVee Model 25 is classic Boston Acoustics. Every component is engineered to meet the highest performance standards. Of course, performance is only one measure of value. So Boston is careful to build all its products with strict attention to everything from the choice of materials to the details of fit and finish. It's how Boston has been exceeding the expectations of serious listeners for over thirty years. The speaker system delivers clear dialogue for television, cinematic surround sound for movies and gaming, and enhanced stereo for music. Perfectly sized for televisions 32 inches and larger, the plug-and-play set includes a soundbar and wireless subwoofer. TVee Model 25 At a Glance One-wire hookup and wireless subwoofer for hassle-free installation Virtual surround sound produces true-to-life audio Soundbar operates with your existing TV remote control Dedicated movie and music modes for the best audio experience Auxiliary input lets you connect a portable media device Backed by a

limited five year warranty Soundbar sits below your TV to fill the room with rich audio. View larger. Plug and play audio system for your TV provides virtual surround sound. View larger. A 6 inch wireless subwoofer produces deep, realistic bass. View larger. Soundbar Enhances Your TV's Audio TVEe Model 25 offers a plug and play solution for televisions that have less than spectacular sound. The system is self powered, meaning it does not require a separate receiver or amplifier. Simply hook it up to enjoy powerful, dynamic audio from your favorite TV shows, movies, games, and music. Hassle Free Installation and Remote Control Operation Installation is easy with the TVEe Model 25. Connect the soundbar to your HDTV with just one cable included, and then mount the soundbar on any wall using its two integrated keyhole wall mounts no need for separate brackets. For further convenience, the subwoofer is wireless, so you can place it anywhere in your room.

To keep things simple, the soundbar uses your television's remote control for operation. Digitally Optimized, Realistic Audio TVEe Model 25 features a digital optical input for decoding Dolby Digital audio content. In addition, the 6 inch down firing wireless subwoofer delivers deep, powerful distortion free bass thanks to BassTrac circuitry. Dedicated Movie and Music Modes Choose from TVEe Model 25's two listening modes to get the best audio experience. Movie mode offers enveloping surround sound that emulates a movie theater environment. Music mode produces concert quality music playback appropriate for casual listening. Either mode can be used for any type of input or audio. Connect a Portable Media Device A 3.5 millimeter auxiliary input on the soundbar's rear panel makes it easy to connect a variety of portable media devices. The TVEe Model 25 plays back your favorite music and videos from an iPod or other MP3 player all with enhanced audio. The Boston Acoustics TVEe Model 25 virtual surround sound speaker system is backed by a limited five year warranty. What's in the Box Boston Acoustics TVEe Model 25 soundbar, speaker grille, wireless subwoofer, detachable power cord, analog RCA cable, digital optical cable, owner's manual, and quick start guide. Amazon calculates a product's star ratings based on a machine learned model instead of a raw data average. The model takes into account factors including the age of a rating, whether the ratings are from verified purchasers, and factors that establish reviewer trustworthiness. Please try again later. Amazon Customer 4.0 out of 5 stars The product arrived in excellent condition. Packaging was superb. Everything was easy UNTIL programming the remotes. The instructions provided, omitted a step in the remote setup and made you read between the lines to figure it out. With so many possibilities, you would get an Excedrin headache in a minute. Follow the following for a seamless remote install.

Holding your remote about 12 inches away from the light SLOWLY depress the up volume button on the remote 4 times or until the orange light changes to green. So now I pressed the down volume once on the soundbar then pressed the down volume button on my remote 4 times until it turned green and so on. Once I got to my Comcast remote, it seemed to have memorized the prior Samsung remote settings so I did not have to program that one. 4. Each TV is different. I went in to my TV menu and changed the audio to external speaker from TV speaker. If you leave the TV speaker selected, one gets sound from the TV speaker PLUS the soundbar. I can live with it. All is now hooked up and the resultant sound, compared to the TV speakers, with the subwoofer is well worth the price and enjoyment watching cable or movies. You can also plug in an iPod in the back to listen to music. The only reason I did not give this product a 5 star rating was the pain in figuring out the remote pairing with the soundbar. Otherwise, excellent product. Pros great accuracy listening to music, easy to setup with TV controller. I am an audiophile, used to install car audio, still a hobby for the speaker size in the woofer, great sound, considering the price. There are better and louder bass drivers out there. Not a problem for listening to music off my iPod easy to do by the way but there are some issues with volume leveling while watching movies. I do not mind if the volume goes way up during a dramatic moment during a movie. I have this connected to 2 year old Panasonic Viera Plasma; this issue of not being able to adjust sound quality or volume leveling may not exist on all brands. As I would not have to mess with the volume much, I would hear little of the TV, and have my EQ and

sound leveling and all. yes. This would work. No. I havent done it. I am lazy. Anyways, good bar, great value, audio quality very good.

Misses the lowest bass notes but its not the biggest driver, and for the size, the woofer thumps means the box was tuned very well and the highs and mids from the bar are very good. Happy customer. Operating as normal. Digital Cinema reserves the right to refuse to price match any product if deemed uncompetitive. Price matching applies to orders prior to purchase. The wireless subwoofer delivers deep and powerful lowfrequencies, that thunder across your listening area. The speaker system delivers clear dialogue for television, cinematic surround sound for movies and gaming, and enhanced stereo for music. Perfectly sized for televisions 32 inches and larger, the plugandplay set includes a soundbar and wireless subwoofer. The system is selfpowered, meaning it does not require a separate receiver or amplifier. Simply hook it up to enjoy powerful, dynamic audio from your favorite TV shows, movies, games, and music. Connect the soundbar to your HDTV with just one cable included, and then mount the soundbar on any wall using its two integrated keyhole wall mountsno need for separate brackets. For further convenience, the subwoofer is wireless, so you can place it anywhere in your room. In addition, the 6inch downfiring wireless subwoofer delivers deep, powerful distortionfree bass thanks to BassTrac circuitry. Movie mode offers enveloping surround sound that emulates a movie theater environment. Either mode can be used for any type of input or audio. The TVee Model 25 plays back your favorite music and videos from an iPod or other MP3 playerall with enhanced audio. Sign up for newsletter today. All transactions are processed in AUD. Frankly, some people really dont need it. However, that doesnt make using those teeny, tinny TV speakers right. Instead, there are plenty of soundbars out there from which to choose. Boston Acoustics has offered a few soundbar solutions over the years. One of the latest, as well as the least expensive, in the companys TVee line is the TVee Model 25. Even better, it adds in bass via a wireless subwoofer. Whether you need an extra boost in the bedroom, basement, or even the living room, this is a pretty easy way to get it. Inside, the unit features two 1.5by6inch drivers. Despite the promise of 150 watts of power, it doesnt have the same girth as a full speaker setup, or even some of the soundbars weve seen. However, it does make for a painfree setup, in more ways than one. Each button offers a single control feature.

There are separate buttons for volume up and down, as well as mute and power. Theres also another button to switch inputs, with the last allowing the listener to flip between music and movie modes. Theres the power input and a power switch, as well as analog audio inputs and three toggle switches. One sets the soundbars location, for table or wall mounting. The last is the Trim Level, which allows you to adjust the input sensitivity. Besides the power, the most important item on the

back of this unit is the optical input, which is tucked away on the side of the recessed area where the rest of the inputs are located. As a nice bonus, Boston Acoustics has included the optical cable, so you can opt for this high quality digital audio connection right out of the box. Forget about DTS, though; this soundbar doesn't offer support for that audio format, even though it's found in some flavor on most new Blu-ray releases. Of course, there are options to get sound from DTS soundtracks on DVDs and Blu-ray Discs. You can use the analog outputs of your player or you can set your player to output DTS soundtracks in two-channel surround encoded PCM sound. It won't be discrete surround, but then, this is a soundbar, after all; not a discrete 5.1 channel solution. For regular TV viewing, you'll be fine using either the optical or the analog inputs. The TV will automatically output a PCM 2.0 digital signal, which is fully compatible with the soundbar. Some TVs even allow Dolby Digital 5.1 passthrough so you can preserve that original bitstream all the way through to the soundbar check your TV's manual or setup menus for details. It seems a bit flimsy, like it could snap off if you push one of the control buttons too hard. The slightly cheesy grille doesn't alter the soundbar's performance in any way, but it does seem out of character for a piece of BA gear particularly once you hear the sound. That grille also makes those same buttons seem more flush than they should be.

Packing in BassTrac circuitry, this unit makes having a subwoofer a no-brainer. Don't want the sub near the rest of your gear. No problem! This little guy is wireless except the power cord, of course. He's also compact enough to stuff into most spaces. The back has a volume control and a power switch. Match up the aforementioned wireless channel on the soundbar, plug the thing in, and you should be ready to rock with bass! Not the TVee Model 25. Boston Acoustics believes that you don't need another dedicated remote cluttering up the coffee table. While we can certainly agree, we sort of missed having that extra control option when it wasn't an option. Otherwise, you're going to drive yourself completely bananas by cranking the soundbar and those presumably crappy TV speakers the ones you're trying to get away from, remember. The process is simple enough. Simultaneously push the power and volume up buttons on the speaker until you see the orange light. From there, push the volume up button on your TV, cable or satellite remote until that speaker light goes green. Repeat for other buttons, such as volume down, mute, and more. Not exactly. Programming volume up was absolutely a breeze. When it came to volume down and mute, we just couldn't get that orange light to come back. It got to the point where we were getting the button imprint in our thumb. This was slightly frustrating, to say the least. After a quick web search, we found that the manual wasn't exactly clear. You must push that volume up button every time, even when programming down, mute, or whatever. The second button push is when you pick the one you're programming. Aha! It was quite impressive, and seemed to cover a lot of our living room. In fact, we had to check some of our wall-mounted speakers, just to make sure that they weren't plugged in; the soundfield actually seemed that wide. The instruments were bold and there was a strong bass presence. That said, the vocals seemed to get a little drowned out.
