I have enjoyed working with Michael, Daniel and their team at Detector Electroics Corp. They have done a fine job representing the Detector Pro line since it was first introduced in 1996. One of the things I see them do is go the extra mile for their customers. It is always nice to see a family run business endure and we wish them many years of continued success. We appreciate the partnership from Michael and Daniel at MetalDetector.com. As a family owned business, we choose our partners carefully. We have found that their team has done a fine job of representing our line. With thirty years of success under their belt, we expect that they will be a partner for many years to come. We at Treasure Products, manufacturer of the VibraProbe and VibraTector, want to congratulate Daniel and Michael on the admirable milestone of being in business for over three decades. The dedication and product knowledge that your staff exhibits has been a great benefit to us. We offer our best wishes for your continued success. I have found that the team at MetalDetector.com has done a fine of job

representing the entire JW Fishers line. They have partnered with us in helping to bring our products to both individuals, larger corporate and governmental organizations. Michael and Daniel have established a knowledgeable team that has done the job of getting the correct product in to the hands of each

consumer. <http://alliedteamworkconstruction.com/nbloom/fckuploads/coremetrics-manual-tagging-for-html-pdf.xml>

I wish them continued success as they represent our products in the years to come. I have been impressed by the professional approach and the experience of Daniel, Michael and the entire team at Detector Electronics Corp. Three decades of superior customer care has been the key to their success and large sales volume. We have enjoyed working with Michael, Daniel and their esteemed team at Detector Electronics Corp. We feel that they have been the best choice for representing the good reputation of the Makro Detectors in the region. They have been working towards 100% customer satisfaction ever since they started their cooperation with us as our exclusive Distributor in the USA and Canada. We are pleased to see both their business and the sales in their region continue to grow. It is nice to see both our family business and theirs growing together. We see our companies moving forward together for many years to come. Garrett has a longstanding quality relationship with Detector Electronics Corp since the 1980s. I have seen them grow from a regional dealer to one of the largest internet dealers yet they have maintained that special care for the customer for over three decades. Their team of knowledgeable, helpful and friendly staff and family make their dealership a first choice for the treasure hunter. MetalDetector.com has been a valuable business partner to Fisher Research Labs for many years. They continue to grow while still offering the best in customer service and after sale support, which is very important to FRL. We wish to congratulate them on 3 decades of business and stellar service to our mutual customers. Their entire staffs knowledge of our product helps to ensure the customer gets the right detector for their needs regardless of what they might be. We look forward to our future relationship and continued success of MetalDetector.com and their entire staff. I recently had the pleasure of meeting with the team at MetalDetector.

com at their newly expanded facility in Southborough, MA. I have to say that I was impressed with their operation and knowledge of the Teknetics product line. When the Teknetics product line was recently relaunched, MetalDetector.com was one of the first partners we contacted. They have had a long standing relationship with the brand as one of the original Teknetics dealers in the country. We value long standing relationships and are excited to have them as a member of our team. Its been an honor and privilege working with the fine folks at Detector Electronics for over 25 years. Its no surprise that Sondra and Davids fine sons, Michael and Daniel have continued in their parents tradition of being exemplary businesspeople who take the time and care enough to really know their clientele. Its always been a pleasure working with you. DRS Electronics, GmbH is proud to have Detector Electronics Corp. I have known Michael and Daniel for over a decade. Their team is genuine and knowledgeable. They provide exceptional support and service to our customers. They are a recognized leader in the industry. Internationally their business is known for excellent customer support. Their presence is a great confidence for treasure hunters. MetalDetector.com has been a great business partner for many years and the best choice for representing Makro Detectors in the USA. With the addition of Nokta products to their product portfolio in 2018, we are confident that our businesses will continue to grow together for many years to come. Gary Micheau CEO Whites Electronics Gary Storm Owner Detectorpro Ingrid Hawk Partner Lesche Products Michael Bernstein Owner Treasure Products, Inc. By the end I felt I was dealing with a friend rather than a faceless company on the net. Well done! And, by the way, my 7 year old son Juanito found a nickel yesterday when he took his detector out for the first time. If things keep going this way the detector will have paid for itself within a few short decades.

<https://skazkina.com/ru/3m-steri-vac-4xl-manual>

But seriously, he is really enjoying it and hoping to find his longdreamedof buried treasure some day. Happy to do business with you, Hello Dan, Remember me. I bought my Tesoro Tiger Shark from you. It came just when you said it would, and works just as you told me it would. Thanks for your help in sorting through the maze of detectors. Dear Sondra, 1160 GRAM Meteorite. Dont ask where. One of many! As far as being excited I all most had a stroke. Heres a photo of one Meteorite I found on the surface, over 800 grams and a 447 gram one. The one in the middle is my first. The bar magnet has some small Iron meteorites on it. Dear Detector Electronics, I received the Tesoro Sand Shark today.and want to thank you. Tried it, love it, looking forward to many enjoyable hours with it. Thanks again. Dear Customer Service, Just wanted to thank all involved in a recent shipment to me that was a gift for my grandkids. I ordered 2 detectors but for some reason only one was shipped. After calling your company you bent over backwards to get the second detector to me on time for giving to my grandchildren. I explained that we exchange gifts a week early so my children and their families can be in their homes Christmas morning since some travel distances are involved. The second detector arrived last Friday in time for our celebration last Saturday. THANKYOU. I order quite a few things online and have experienced some terrible companies but you are the best. Best regards and have a wonderful Holiday Season Hi Guys, I have just come in after spending an hour or at my local beach with my son, which is only a 5 minute walk from my home called Deception Bay. This is the first time i have ever used detector. The very first thing it detected in less than a minute was a two dollar coin, boy we were so excited. Not by the amount, but by the fact that on its maiden voyage it detected a coin. We then detected a ten cent piece.

<https://www.ortorehab.se/images/casino-security-officer-training-manual.pdf>

We cant wait to take it to a popular beach and I will practice more with the settings. I would like to thank you for your prompt service. My detector arrived at my door In Brisbane Australia in less than a week. This is the first time I have used any service like this outside of Australia, but with this kind of service and ease of buying and your range of goods this will be the first of many transactions. I just wanted to say thank you to Scott who made my recent purchase so pleasant. I am enjoying my Tesoros and have found lots of cool stuff so far. Just waiting for that first gold find. Thanks again for all the help that was provided in making my decision. Hi Scott, I was amazed at how fast I received my BOUNTY HUNTER. The order arrived in perfect condition, and in only three days after I placed the on line order. The four part series about selecting the right product was also appreciated and helped me to make the right decision for my purchase. You are truly a company that takes care of business and most importantly your customers. It is a pleasure doing business with you and I will gladly recommend you to anyone that wants to buy a metal detector. Thanks for the GREAT SERVICE. Dear Customer Service, I am a very happy camper. Yesterday I took my Garrett Ace 250 out for the first time to some local parks. My total find was about 150 coins. The detector works so well and so easily. It only took me about a half an hour before I new what every button did. PS I plan on buying my next detector from you. Dear Sondra, I purchased an Ace 250 from your site for my 7 year old son and now I am hooked. This is our first metal detector and the Ace does every thing it says it will. Thanks for the fast delivery and introducing my son and I to a great new hobby. Coin shooting in Pensacola, Fl Sondra, I got the detectormy husband was thrilled. Thank you so much. You and Daniel have been so helpful. I am a first time buyer and am feeling very lucky to have found your website.

<http://germanbandhsv.com/images/casing-design-manual-pdf.pdf>

Daniel helped me to locate a really great detector and you have been extremely courteous and prompt in seeing my order through. I look forward using my new metal detector. Hope you have a wonderful holiday season.overall my experience ordering off of your website was convenient and

customer service was great. Thanks again. Dear Metaldetector.com I just want to thank Sondra and the rest of the gang for my Minelab Explorer SE. It was a pleasure doing business with you and I will recommend your fine business to my other detecting buddies. Anita S. and Juan G., United Kingdom Mike T., Rockport, MA John B., San Diego, CA Dana, Mystic, CT Dick H. Steve M. Nick V., Churchville, PA Duane B., Springville, NY Bill B. David and Josh Lori G., Bessemer, AL Jason R, Massachusetts Our NoHaggle, BestPrice Guarantee on Metal Detectors The same low pricing for everyone. Whether you're a metaldetecting expert or novice, we keep it simple. We offer the lowest advertised pricing allowed by contract with each manufacturer. The personalized service you receive from our experienced team is our added bonus. That's what we are all about. Rest assured, you will not find a better value online. Visitor I received the parcel today. Dan Great! It came right to your home. This is our first metal detector and the Ace does everything it says it will. We Ship Direct To You Detector Electronics Corp. Michael and Daniel lead the MetalDetector.com team. Each day we set out to provide you with the best customer experience in the industry. Wherever you are in the world, product specialist Maria is here to help. Maria speaks fluent English and Spanish. Heather interfaces between our office and warehouse teams to help expedite orders to our customers around the world. Moe is not only one of our product specialists; he was also one of our first customers. He has been metal detecting since 1989. Dave keeps all of the great deals and products that you see on our website up to date.

When it comes to managing the warehouse to get the orders to our customers quickly and efficiently, Bob, Matt and Jake are our A team. Tom, Diana and Javier work closely with our customers to provide the highest level of customer care in the industry. Before shipments are accepted from vendors, our team closely inspects inbound orders for accuracy. As metal detectors and accessories are received, our team packages and labels each item. Large shipments arrive from vendors in bulk. They are stored in our newly constructed bulk goods warehouse. Inventory is transferred from the bulk goods warehouse to our main warehouse where orders are picked, packed and shipped to customers. As customer orders arrive in the main warehouse our team hand picks the items. The items picked are checked for accuracy throughout the process. Michael and Bob confer on an item as an order is pulled for a customer. Once picked, orders flow down the conveyor on their way to the packing station. As the order nears the final stages of the process, each order is over packed and then cushioned with recycled materials. Michael adjusting an early Garrett Metal Detector in North Carolina at the first treasure hunt we ever displayed our products at back in 1985. Sondra on the road again helping a customer learn about the hobby at a metal detector show. Daniel and Sondra, posing for a picture while on a family metal detecting vacation in the Caribbean. Sondra and Daniel at another one of the hundreds of treasure events that they attended in the early years across the United States. Michael and Daniel pose for a picture inside the Minelab headquarters in Adelaide Australia while attending a distributor meeting. Michael and Daniel attend Treasure Week in Seymour Indiana, one of the largest organized treasure hunts in the country. David, Michael and Daniel posing after a day of metal detecting at the beach. In the early years Sondra worked tirelessly and wore many hats.

With builtin Automatic Ground Trac, the Tracker IV balances for mineralization while you detect. The Tracker IV will detect in extreme ground conditions from salt wet beaches to highly mineralized inland sites with no operator adjustments to the circuitry and with no loss of sensitivity. Amazon calculates a product's star ratings based on a machine learned model instead of a raw data average.

The model takes into account factors including the age of a rating, whether the ratings are from verified purchasers, and factors that establish reviewer trustworthiness. Please try again later. Web Puddin 5.0 out of 5 stars Paid for itself in less than 2 hours. I bought it for one purpose, so can only speak to that. When we established our property to build our house in a rural area, we had to have water lines and cable lines threaded through some trees. When we did it, I was forward thinking I thought and marked the lines with Survey Marking Whiskers. But over time, dirt, grass, leaves, mulch, and pine straw buried them, and any that were not buried suffered from the ultraviolet sunlight making the plastic tops of the whiskers brittle, and thus the tops disintegrated. Gradually, I found, I could no longer tell where my lines were. Today after one or two little practice sessions, I went out with the Bounty Hunter TK4 and found ALL of my markers. There is no way I could have located those lines without a metal detector. Other detectors may have found them; may have found them better. All I can say is this did exactly what I needed it to do and so paid for itself in a few hours use. Anything else I do with it is gravy. Hopefully it will be useful in other ways and fun as well. In searching the last leg of water lines I got a ping where I was surprised to find one. So I switched to discrimination mode. Got a LOW pitched buzz. Manual says. nickel or GOLD! Ill dig in that place later. Who knows it might MORE than pay for itself. LOL! Also, FYI, I found the one survey iron rod for a property corner that was close to where I was working that was hammered beneath ground level in a ditch. I knew roughly where it was. A few more technical items It is lightweight; easy to handle. It is easy to operate; the manual is clear.

Pretty easy to put together, though I'm a little concerned about, as some mentioned, the lower stem to search coil intersection is plastic, with a knurled knob. If the parts are easily replaceable, no problem. Otherwise, might be a weak link that sinks the entire ship. I'm not a treasure hunter yet so this may not contain all the stuff you guys would be interested in, but I had read some questions that asked about the kind of interests I had with locating survey rods, etc., so decided to do a review from this perspective. I bought it as a gift for my father to use while he was in a beach house in Florida for the winter. While visiting we used it quite a bit and actually found a lot of metal see pic. Overall nothing of value, but it was a first time ever user, so finding anything was fun, plus there is definitely a learning curve. First trip out we had a lot of false positives and it was slightly frustrating. But after some time it became easier and easier to find things. Tips If you accidentally touch the ground while sweeping back and forth, even very lightly, it will often emit a false positive tone. You'll get frustrated fast. If you are a first timer I'd recommend the following settings 1 Set sensitivity left side knob to the 3 o'clock position. Any higher and false positives are common. I purchased this for my first metal detector just to start out and I have to say I like it a lot. It was very easy to put together and set up. I used it the other day for the first time at a local park and I found several coins and I had fun doing it. For the price you can't beat what you get. If I really get into it I will upgrade but I will

always keep this one going to pick up some earphones for it and im good to go. Do yourself a favor, if your thinking about it just pull the trigger you wont regret it this is a very nice metal detector. Packaging could have been better but that has nothing to do with the performance of the machine.

Was in tall thick St Augustine, knew general area and I tried all the tricks flashlight at night, cutting the grass real low and using a fine rake but no luck. After wasting many hours decided to get a metal detector its happened before and was lost for over a year even after renting a detector the dog found it and had it with her outside toys she is a tracking dog so makes sense that she smelled me on it. Look forward to going treasure hunting now. The choice is huge and the reviews don't always stack up. I followed this up with more Googling about this specific detector and my mind was then made up. The Tracker IV was ordered. Since it arrived I have been out in the garden three times with my 11 year old, getting used to how it works and digging up everything from pull tabs, rusty iron, two old pennies one dated 1862, a few small and modern coins, a lead soldier, a lead motorbike and a couple more lead toy things. This is a great entry level detector!! I also read that a lot of serious detectorists learned on the BH Tracker IV and still keep it as a back up to their much more expensive machine. Don't let all the reviews confuse you. The two 9v Duracell batteries seem to last well so far and this machine can detect more then 6 inches down. I think you can tell that I am very impressed with it. Ignore every other model of a similar or cheaper price. This is tried and tested technology and will give you a fantastic start in detecting but will also stay with you way beyond the novice level. Sorry, we failed to record your vote. Please try again I unpacked it, assembled it to the shortest height, batteries in and tried it out. It was a short time until I began to get to grips with the various settings but once I got there it became pleasurable to use. I started in the garden on the borders and soon found nails old screws and even paper staples.

I would suggest that it might be a good idea to consider purchasing a pinpointer detector to accompany the TK4G, this has a much smaller field of play making small objects easier to find once the TK4G has said theres something there!! Well recommended. Sorry, we failed to record your vote. Please try again But have found many coins and trash. One warning thou, it does say that it is not waterproof and bye golly its not. One quick short sharp shower caught on a beech, caused the speaker to fail. Now have to use headphones all the time now. 5 stars otherwise. Sorry, we failed to record your vote. Please try again Its easily the best detector under 150 though. Very good for beginners wanting to get into the hobby but you will most likely get a better model in future if you really get into it. Sorry, we failed to record your vote. Please try again Better spec when compared to other detectors. Sorry, we failed to record your vote. Please try again I have used some times for some hours with no problems. Could find coins and other metal pieces in the beach and under soil. Sorry, we failed to record your vote. Please try again Sorry, we failed to record your vote. Please try again A very good entry level for the beginner very easy to use! Sorry, we failed to record your vote. Please try again Lightweight and easy to hold and carry. Great beginners metal detector. Sorry, we failed to record your vote. Please try again. purchasers, and factors that establish reviewer trustworthiness. Please try again later. Jennifer 5.0  
out of 5 stars Since it happened at night, I couldnt see where it landed. My husband and I spent two  
days searching the heavy grass and large bushes nearby in the freezing cold without any real  
success, so we were pretty disheartened by the time this guy arrived. But, less than 30 minutes after  
we took this out to the yard, we found my ring. I cant speak to its use in anything else, but it served  
its purpose for us very quickly. I am very happy with this purchase.I purchased this item to find it.  
However, before it arrived my wife spotted the ring so I returned it. Fastforward one week later, I  
lost yet another metal item this time the cross from my necklace in the sand. I looked for 45 minutes  
and could not find it.

I repurchased this metal detector and, after some practice finding 4 hair clips, 3 paper clips, a long  
nail, a screw, an aluminum can, and 51 cents, I eventually came across a small blip that turned out  
to be my cross. Also, for reference, this can detect titanium so this would have found my wedding  
ring too had I needed it. Highly recommended if you need to find something precious that you lost,  
and need to do so cheaply.What a great beginner metal detector for the money. It not to come with  
two 9volt batteries not included. The batteries will A small shovel and dirt strainer make sure you  
order one so you get all of them at the same time, you will need it. Water personal hydration; I must  
have walked 5 miles before I even knew it. First item found was a large fishing hook about 1.5  
inches down in soft sand this is why you use a small shovel to dig. I will update once I have time to  
play with it. Head phones are a bit cheap feeling as well, but I used a set I had laying around and  
they plugged right it. Bang for the buck is right here. Creates a great first time experience for the  
newbie. Already looking forward to the next level.It seems that every winter I have to call the water  
company to come and find it for me. The last time they came I noticed they used a metal detector to  
find it. It took like 1 minute to find. So I decided to start doing it myself and began looking for a  
cheap easy to use but effective metal detector. I found this one. It works like a charm every time and  
its easy to use. I actually started using it for a lot more than my intended use. I walked my whole  
property with it and found everything from jewelry to coins and some old toys that were buried like  
50 years ago. Pretty cool for just using a basic metal detector. I only gave it 4 stars because 5 stars  
are for angels and gods.In addition, one of the first reviews they included was that of a supposedly  
satisfied customer that found a lost gold wedding band within minutes of use.
