resolution you need to email, print, crop, and even enlarge. For closeups that will impress you with their clarity and true-to-life brilliance, you've got a genuine Canon 3.4x optical zoom lens that brings distant images into focus with one press of a button. Large, high-resolution 2.5-inch LCD makes on-camera viewing easy. The camera's 2.5-inch LCD screen gives you the big picture, whether you're shooting, reviewing or showing off your images. This high-resolution screen offers a crisp, clear picture and bright, it also features Night Display for easy viewing in low light. Powered by AA batteries. Conveniently, you don't need to worry about running out or recharging of batteries. Since AA-size batteries can be purchased at any store, simply get new ones locally. With Canon's Face Detection WB right, skin tones are not affected by overall lighting. Enhanced Canon Face Detection Technology. Canon's powerful Face Detection Technology delivers even better results with the new A470.

The Face Detection Technology continues to recognize faces in a scene, and concentrate exposure daylight or flash and focus upon them. But the A470 adds more. Face Detection WB means the camera concentrates upon faces when calculating white balance for the best possible skin tones. Face Select and Track lets the A470 user highlight one face among several in a scene, and the camera concentrates on that person, even as they move around the scene. Face Detection Technology is a powerful contributing factor in Canon's new Motion Detection Technology. DIGIC III image processor. With DIGIC III, your images boast superior quality, the camera operates at top efficiency and battery life is enhanced. What's more, DIGIC III enables Canon's Face Detection Technology and Redeye Correction to give you better, more true-to-life people shots. Simply press the Shutter Button halfway down, and the camera automatically pinpoints the faces in the scene and chooses the ideal focus point. The camera controls exposure settings and flash to keep every face looking bright and natural. Redeye Correction can be handled in-camera, in two ways. The entirely new Redeye Correction during shooting uses the Face Detection Technology to recognize and remove red-eye from flash images as they're taken, before the file is written to the memory card. It's also possible to correct red-eye during image playback, using simple settings in the A470's menu. Using an internal database of thousands of different photos, iSAFS works with the fast DIGIC III Image Processor to improve focus speed and accuracy, as well as exposure and white balance. Redeye Correction. Redeye correction provides three options for removing red-eye from subjects in flash pictures. The new Redeye Correction during shooting actually identifies and corrects red-eye in human subjects as pictures are taken. The A470 can be set to automatically detect and correct red-eye during image playback.

The user can manually locate any red eyes in a scene during image playback on the LCD screen, and command the camera to remove them. Capture clear pictures, even when your subject is moving. Motion Detection Technology automatically reduces blur. Life doesn't stand still for picture-taking. That's why Canon included its advanced Motion Detection Technology in the PowerShot A470. This sophisticated feature works in the background to instantly evaluate how fast your subject is moving. Then it automatically selects and sets the optimal exposure and ISO settings to keep everything looking sharp and clear. So whether you're shooting a bride walking down the aisle, a ballet recital or even a child's soccer game, you can relax and shoot with confidence knowing you've got the picture you intended. High ISO. The PowerShot A470 features ISO 1600 and High ISO Auto settings that reduce the effects of camera shake and sharpen subjects in low-light situations, giving you greater shooting flexibility. 14 Shooting Modes including 10 Special Scene Modes. With 14 shooting modes to choose from, you're ready for whatever shot comes your way. Vertical shooting is fast and easy. The PowerShot A470 lets you shoot great Vertical Images everything from tall buildings to fun, family photos more conveniently. Instantly, the camera displays your scene in the proper vertical orientation. You don't have to worry about rearranging your hand position. You're free to concentrate on setting your scene, composing your shot or coaxing subjects to smile. Sleek, modern design in 4 bold colors. The PowerShot A470 tells the world who you are. Kathleen Gent 5.0 out of 5 stars I spent hours researching and I was so grateful for the excellent customer reviews here at Amazon. They told me everything I needed to know and more. I bought the camera, a Transcend 4 GB Class 6 SDHC Flash Memory Card TS4GSDHC6E, a Transcend 4 GB SDHC Class 6 Flash Memory Card with Card Reader TS4GSDHC6S5W, and a Duracell Mobile Charger with 2AA PreCharged Rechargeable Nimh Batteries CEF23DX2 to get her started. Later I bought her a few more 4packs of Duracell rechargeables. Almost four years later, everything is still working perfectly together. In the intervening years, this camera has gathered hundreds more excellent reviews, and it deserves them. Im not qualified to talk about all its technical features and others have done that so well already, but Im glad to share my daughters experience with it. Its so userfriendly that not only my daughter, but also my little granddaughter, quickly figured out how to use all its features. It takes beautiful pictures and excellent little videos that are so much fun to watch. It gets dragged everywhere, sometimes without even a case, it takes all kinds of hard use and hard knocks, and it still works perfectly. Thanks to the faithful Amazon reviewers who helped me choose this camera, and thanks to Amazon for selling such great products.I purchased it for my wife as a replacement for an earlier generation Sony about two months ago.
