Canon i250 / i350 – “Emptying Used Ink Tank”

DISCLAIMER – This information is supplied without charge and is for guidance only. The author accepts no responsibility for any damage, loss or injury.

The Used Ink Tank is a sump at the bottom of the printer containing two shaped sponges that soak up excess ink that is wasted as a result of the head clearing process. This process takes place whenever you have opened the front of the printer to change cartridges or can be invoked by the user through the maintenance menu.

A warning message will be received when the tank is almost full, but it is possible to continue printing anyway by pressing the “Resume” button. I have heard that eventually you get a message saying that the used ink tank is full and the printer then refuses to operate at all. I cleaned mine before it got to that stage.

It is fairly obvious that the manufacturers never intended the emptying process to be undertaken by the user. However, the cost of having it done in a workshop is uneconomic. It makes more sense to throw the thing away and buy new. However there is nothing technically complex about this job. It is just a bit fiddly and requires patience, dexterity and a methodical approach. Anyway, you might as well give it a try – you have nothing to lose.

Allow several hours for the job. Find a quiet place to work. Banish all children and domestic pets! You will need two small screwdrivers. One recess and one flat bladed – the second is only to use as a lever. Warning: The ink will stain your fingers and can take several days to fade.

1. Disconnect from the mains supply and computer.
2. Remove both end caps from the printer. These just pull off. Note that they are different and must be refitted to the correct ends. You can use one of them as a tray to safely store the screws that you will remove. You could also take off the front flap by levering the hinge pegs out of their sockets – not absolutely necessary, but it makes the printer easier to handle during the subsequent stages.

Below are few guidelines regarding how and why you should collect the product manuals. However, we believe that the manuals should include the most important and needed information about Canon i350, not to discourage the user to read. Obviously, if a device Canon i350 has multiple advanced functions, we will not avoid a high amount of information in this document. Then, it will be much easier to find it than look through the purchase boxes which have already been thrown away by you or any other of household members. It will be enough to clear the drawer once in a year and throw away any manuals of the devices you do not use anymore. Thus, you can avoid storing any unnecessary documents and keep only those which are valid. You can also download and print the manual Canon i350 to place it in your drawer.
