Search All ICD-10 Toggle Dropdown Get crucial instructions for accurate ICD-10-CM B95.61 coding with all applicable Excludes 1 and Excludes 2 notes from the section level conveniently shown with each code. This section shows you chapter-specific coding guidelines to increase your understanding and correct usage of the target ICD-10-CM Volume 1 code. For the ICD code B95.61, which indicates a Methicillin susceptible Staphylococcus aureus infection as the cause of diseases classified elsewhere, the relevant CPT codes would depend on the specific procedures or services provided to treat the condition. Here are some general categories of CPT codes that might be applicable:1. Evaluation and Management (E/M) Codes: These codes are used for office visits, hospital visits, and consultations. Examples include: - 99201-99215 for office or other outpatient services - 99221-99239 for hospital inpatient services2. Laboratory and Pathology Codes: If laboratory tests are conducted to diagnose or monitor the infection, relevant codes might include: - 87070-87075 for bacterial culture, aerobic - 87186 for susceptibility studies3. Surgical Procedure Codes: If surgical intervention is required, such as incision and drainage of an abscess, relevant codes might include: - 10060-10061 for incision and drainage of abscess4. Antibiotic Administration Codes: If antibiotics are administered, either orally or intravenously, relevant codes might include: - 96365-96368 for intravenous infusion for therapy, prophylaxis, or diagnosis5. Radiology Codes: If imaging is required to assess the extent of the infection, relevant codes might include: - 71045-71048 for chest X-ray - 73721-73723 for MRI of the lower extremityIt is important to note that the selection of CPT codes should be based on the specific services provided and documented in the patient's medical record. Always ensure coding accuracy by consulting the latest CPT code set and guidelines. 2016 2017 2018 2019 2020 2021 2022 2023 2024 2025 Billable/Specific Code B95.61 is a billable/specific ICD-10-CM code that can be used to indicate a diagnosis for reimbursement purposes. Short description: Methicillin suscep staph infct causing dis classd elswhr The 2025 edition of ICD-10-CM B95.61 became effective on October 1, 2024. This is the American ICD-10-CM version of B95.61 - other international versions of ICD-10 B95.61 may differ. Applicable ToMethicillin susceptible Staphylococcus aureus (MSSA) infection as the cause of diseases classified elsewhereStaphylococcus aureus infection NOS as the cause of diseases classified elsewhere The following code(s) above B95.61 contain annotation back-referencesAnnotation Back-ReferencesIn this context, annotation back-references refer to codes that contain:Applicable To annotations, orCode Also annotations, orCode First annotations, orExcludes1 annotations, orExcludes2 annotations, orIncludes annotations, orNote annotations, orUse Additional annotations that may be applicable to B95.61: A00-B99 2025 ICD-10-CM Range A00-B99Certain infectious and parasitic diseasesIncludesdiseases generally recognized as communicable or transmissibleType 1 Excludescertain localized infections - see body system-related chaptersType 2 Excludescarrier or suspected carrier of infectious disease (Z22.-)infectious and parasitic diseases complicating pregnancy, childbirth and the puerperium (O98.-)infectious and parasitic diseases specific to the perinatal period (P35-P39)influenza and other acute respiratory infections (J00-J22)Use Additionalcode to identify resistance to antimicrobial drugs (Z16.-) Certain infectious and parasitic diseasesB95-B97 2025 ICD-10-CM Range B95-B97Bacterial and viral infectious agentsNoteThese categories are provided for use as supplementary or additional codes to identify the infectious agent(s) in diseases classified elsewhere.
