# CAKEPHP TUTORIAL FOR BEGINNERS STEP BY STEP

## Rapid Application Development

With CakePHP 1.3

Cakephp 3 installation tutorial. Cakephp 3 tutorial for beginners step by step. Cakephp 3 authentication tutorial. Cakephp 3 api tutorial. Cakephp 3 crud tutorial. Cakephp 3 validation tutorial. Cakephp 3 pagination tutorial. Cakephp 3 tutorial pdf.

What Are The Different Display Styles Of List Items? Answer :Modal windows are usually used as dialogs, and have restricted functionality compared to modelless windows. Answer :Record group column names cannot exceed 30 characters. Answer :Post-form commit fires once during the post and commit transactions process, after the database commit occurs. Answer : set\_item\_property get\_item\_property (by setting the LOV\_NAME property) Oracle 11g Interview Questions Question 37. The post-database-commit trigger fires after oracle forms issues the commit to finalized transactions. From Which Designation Is It Preferred To Send The Output To The Printed? How Do You Display Console On A Window ? Answer :No Question 53. How Do You Create A New Session While Open A New Form? PL/SQL Interview Questions Question 12. Answer :To specify the order of individual group evaluation in a cross products. Oracle apps Interview Questions Question 21. What Is The Use Of Image\_zoom Built-in? If the value in the text item matches one of the values in the first column of the LOV, validation succeeds, the LOV is not displayed, and processing continues normally. Question 31. What Are Visual Attributes? Oracle 7.3 Interview Questions Question 30. Whereas the edit\_textitem built-in needs the input focus to be in the text item before the built-in is executed. Answer :Tool bar canvas views are used to create tool bars for individual windows. What Is The Difference Between Show\_editor And Edit\_textitem? Form parameters are variables of type char,number,date that you define at design time. Answer :Read only SQL Interview Questions Question 41. Can You Pass Data Parameters To Forms? Answer :When-image-activated fires when the operators double clicks on an image itemwhen-image-pressed fires when an operator clicks or double clicks on an image item Oracle 10g Interview Questions Question 3. Answer :There are three most common types of complex master-detail relationships: master with dependent details master with independent details detail with two masters Question 23. Question 36. What Is The "lov Of Validation" Property Of An Item? Answer :Rep file and Rdf file. Once you digest all basics, the course will help you create your very own Opinion Poll application. Oracle 10g Interview Questions Question 13. What Is The Use Of Transactional Triggers? If the value in the text item does not match one of the values in the first column of the LOV, Oracle Forms displays the LOV and uses the text item value as the search criteria to automatically reduce the list. The course is geared to make you a PHP pro. Answer :Removes the source code from the library file and generates a library files that contains only pcode. Answer :To manipulate images in image items. PL/SQL Interview Questions Question 34. Answer :performing the calculation in the query is faster. What Is Use Of Term? What Is New\_form Built-in? To include the console, set console window to Null. What Are The Master-detail Triggers? Question 48. What Are The Ways To Monitor The Performance Of The Report? Question 35. Answer :When flex mode is on, reports automatically resizes the parent when the child is resized. Explain About Horizontal, Vertical Tool Bar Canvas Views? Question 46. Answer :Parameters provide a simple mechanism for defining and setting the valuesof inputs that are required by a form at startup. Oracle 9i Interview Questions Question 6. Answer :When one form invokes another form by executing new\_form oracle form exits the first form and releases its memory before loading the new form calling new form completely replace the first with the second. Answer :Timer is an "internal time clock" that you can programmatically create to perform an action each time the times. Answer :When LOV for Validation is set to True, Oracle Forms compares the current value of the text item to the values in the first column displayed in the LOV. Question 49. Question 2. Answer :no Question 54. Which Of The Above Methods Is The Faster Method? What Are The Different Windows Events Activated At Runtimes? Answer :The pop list style list item appears initially as a single field (similar to a text item field). Answer :When\_window\_activated When\_window\_closed When\_window\_deactivated When\_window\_resized Within this triggers, you can examine the built in system variable system. What Are Modal Windows? Answer :On-Check\_delete\_masterOn\_clear\_detailsOn\_populate\_details Question 52. What Is A Timer? What Is Term? What Are The Different Default Triggers Created When Master Deletes Property Is Set To Non-isolated? What Are The Different File Extensions That Are Created By Oracle Reports? Explain About Stacked Canvas Views? Answer :percentage of total functions. Which Parameter Can Be Used To Set Read Level Consistency Across Multiple Queries? Answer :Master Deletes Property Resulting Triggers-----Non-Isolated(the default) On-Check-Delete-MasterOn-Clear-DetailsOn-Populate-Details Answer :There are two phases of block coordination: the clear phase and the population phase. Question 56. Stacked canvas views obscure some part of the underlying content canvas view, and or often shown and hidden programmatically. Answer :Using transactional triggers we can control or modify the default functionality of the oracle forms. On some platforms for example operators cannot resize, scroll or iconify a modal window. Question 38. This tutorial is designed for beginners with little or no PHP experience. Data parameters are used to pass data to products invoked with the run\_product built-in subprogram. Answer :The coordination properties are These Properties determine when the population phase of block coordination should occur. Click here to Logout. In this login logout example in PHP we used 3 filelogin.phpindex.phplogout.phpCREATE TABLE `login\_user` ( `id` int(11) NOT NULL, `name` varchar(60) NOT NULL, `user\_name` varchar(20) NOT NULL, `password` varchar(20) NOT NULL ) ENGINE=InnoDB DEFAULT CHARSET=latin1;
