Follow us Discord: site: POLICY: iPad: fixed an issue blocking some players entering the game. The game is amazing and so fun to play and it has only just been released so I'm amazed at the quality. However, I disconnect from the game all the time so I don't get to earn coins for winning or even participation. My internet at home is fine and it works for other games and apps but for some reason me and my friends always disconnect from games. Hopefully it gets fixed soon! Hi my name is Nathan and I love your updates and things! I can't believe there is now a multiplayer hello neighbor with no AI! But the thing is when you made the new map and new update where you can buy emotions, I couldn't get the update which is weird. Also here is a bug you should fix because whenever I run, the neighbor gets me in a very long distance. But again I love your game and I hope you make hello neighbor 3! I understand if you are busy but it's fine. Edit: By the way I play on XBOX not on iPad. My XBOX secret neighbor is not getting any updates. This game is good I've saw many YouTubers play this on their PCs and now it's on phone it runs okay the game feels okay when you play it but on PlayStation it's £15 for a free game on a phone I wish you could get the free version on PlayStation but not get all the characters like you did on the phone please do this there will be more players and probably more people playing on PlayStation The developer, tinyBuild LLC, indicated that the app's privacy practices may include handling of data as described below. This multiplayer game has many similarities with Hello Neighbor. Neighbors are not only "talkative" people but also really scary from the perspective of games like Secret Neighbor. To decipher the unusual noises at this house, you'll sneak in and find out what's really going on inside. The experience of playing with a team makes the game more unique and new. If it's just you, everything will be a lot more tedious because it doesn't escape the general pattern. However, in multiplayer mode, you will have to watch out for your neighbors and other players. Because among them, one is a traitor. This person always finds a way to "stab in the back" of others. Secret Neighbor currently has 2 game modes. You can experience Custom Game or Quick Play. This HOT game has opened registration on the App Store application market. To experience the game, click download to own a special version of Secret Neighbor APK to your device. It was developed by Russian game studio Dynamic pixels and it is a one of its kind game. This is a multiplayer game that acts from a first-player perspective. A total of 8 players can play the game with each other. Among those 8 players, one of them is disguised as a neighbor and the role of the other 7 players is to sneak into the neighbor's house and find the keys to the basement and find out the secret of their neighbor. The role of the disguised neighbor is to stop the other players from reaching their goals. He can do this by distracting them by going up against their trust and using the powers and gadgets that he has. When you are caught by a neighbor you have to start again. But the thing that makes this game more difficult to play is whenever you have to start over you have to be more careful as the AI of the game now knows your previous moves and will facilitate the neighborhood according to your old moves so be careful how you play the game.
