Yaesu ft70d firmware update. Yaesu ft-70de manual. Yaesu ft 707 manual. Yaesu ft 70 firmware update.

Check the clone cable connection, and redo the operation from the beginning. Page 746 FT-70DR/DE Advance Manual. If you suspect malfunction, check the following items before requesting a repair. HRO Important Links HRO Locations Used & Open Items FTM-6000 2M/440 Atlas 4K FT-65R Dual Band Z100 Tuner 45FT-70DR/DE Advance Manual. Connecting to a PC to update the transceiver firmware, connect your PC to the DATA terminal of the transceiver with the supplied mini USB cable, as described below: Updating the firmware of the FT-70DR/DE may be updated. Press the [BAND] key on the transmitting transceiver. The "--TX--" is displayed on the transmitting transceiver and then data copy starts. The display on the receiving transceiver changes from "--WAIT--" to "--RX--". When data transmission begins, the transmission data amount bar graph appears on the LCD. 6. When copying is completed, the receiving side transceiver returns to the normal mode. In this case, replace the battery pack with a new one. Charge the battery pack within the temperature range from +5 °C to +35 °C (+41 °F to +95 °F). Page 8 Copyright 2010 YAESU MUSEN CO., LTD. All rights reserved. No portion of this manual may be reproduced without the permission of YAESU MUSEN CO., LTD. YAESU MUSEN CO., LTD. Tennozu Parkside Building 2-5-8 Higashi-Shinagawa, Shinagawa-ku, Tokyo 140-0002 Japan. YAESU USA 6125 Phyllis Drive, Cypress, CA 90630, U.S.A. YAESU UK Unit 12, Sun Valley Business Park, Winnall Close Winchester, Hampshire, SO23 0LB, U.K. 1809-E. The battery pack cannot be charged or battery power depletes immediately after charging. Is the battery pack being charged with a charger specified by Yaesu? Charge the battery pack using the accessory battery charger (SAD-18B) or the rapid charge cradle (SBH-28). Turn off the power of both FT-70DR/DE transceivers. 2. On the transmission side transceiver, the indication on the LCD returns from "--TX--" to "CLONE". 7. When a new firmware update for the FT-70DR/DE is available, download the data from the YAESU website to update the FT-70DR/DE to the latest version. USB Cable (supplied) DATA Page 243 FT-70DR/DE Advance Manual. Functions to Use as Necessary Using the Transceiver for Packet Communication You can perform packet communication with your transceiver by connecting a TNC (Terminal Node Controller) using an optional Microphone Adapter (CT-44). TNCSPGNDGND2 k010 FMCIMICEARPTTCT-44MIC/SP After connecting the TNC to the transceiver, set the output signal level to the TNC by adjusting the sound volume level of your transceiver. Also, adjust the signal level input to your transceiver using the output level adjustment volume on the TNC (Input level cannot be adjusted on your transceiver). When sending a vast volume of data, the transmission takes a longer time and the transceiver may be overheated. If the transmission is continued for a long time, the overheat prevention circuit will operate and the transmission power decreases. The battery pack is presumed to be at the end of its service life, or defective. Two seconds after the signal fades out, scanning resumes. HOLD Scanning stops on the current receive frequency (Scanning does not resume). There is no transmission of radio waves. Are you pressing the PTT switch properly? Is the PTT lock on? Is the Busy TX Block (BCL) function on? When the Busy TX Block (BCL) function is on, transmission cannot be done when receiving a signal even if the PTT is pressed. Check that the output voltage of the SDD-13 or the E-DC-6 is approximately 12V. Remove the rubber cap from the MIC/SP jack of the each transceiver, then connect the optional clone cable (CT-27). Scanning may be resumed manually. For more details, see "Setting the Receive Operation When Scanning Stops" (Operating Manual). 53 SCN.STR Set the scanning restart time. Set the time interval to resuming scanning after a received signal halts scanning. Wait until signal being received stops and then press the PTT switch. Is the transmission frequency on a ham radio band? Transmission cannot be performed on the AM Radio Broadcast Band/ Short Wave Radio Band/ FM Radio Broadcast Band/ Air Band/ Information Radio Band. Is the voltage of the battery pack or external power source correct? Check the remaining charge on the battery pack. In addition, using an inadequate power supply where voltage drops during transmission will prevent the FT-70DR/DE from operating at full capability. Turn off the power of both transceivers, then disconnect the clone cable. When the "ERROR" appears on the LCD during data transfer, copying cannot be completed. And when you click on the file or icon it will count as a download. The beep sounds at about 10 seconds before returning to return to receive mode automatically. 57 TS MUT Turn the muting function ON/OFF during tone search. Set whether or not the audio outputs during tone search. OFF Does not mute the audio during the tone search operation. ON Mutes the audio during the tone search operation. 58 TS SPD Setting of the tone search speed. Set the tone search speed. FAST Speed up the tone search operation. SLOW Slow down the tone search operation. 59 VER. INF Displays the CPU and DSP firmware version of the transceiver. C.x.xx The software versions of "CPU" is shown. D.x.xx The software versions of "DSP" is shown. Page 440 FT-70DR/DE Advance Manual. 51 SCN.LMP Set back light ON or OFF when scanning stops. Sets the back-light operation when a received signal pauses the scan. OFF The back light does not illuminate when scan stops. ON When scan stops scanning temporarily, the back light turns ON. 52 SCN.RSM Set scan resume condition when receiving the signal and pausing the scanning, select the receive operation. The keys or DIAL does not respond. Is the Key Lock or DIAL Lock on? 3. The transceiver does not turn on. Is the battery depleted? Charge the battery pack after purchase, and when the transceiver has not been used for a long time. The battery pack properly attached. Refer to "Installing the Battery Pack" on the Operating Manual and securely install the battery pack. Is the external power supply properly connected? When using an external power supply, connect the external power supply adapter with a cigarette lighter plug (SDD-13) or an external power cable (E-DC-6) to DC input jack. Is the voltage of the battery pack or the external power supply correct? Be sure that there is a charge left in the battery pack (do not completely discharge). If you can't find a manual please do not contact us, all the manuals we have are online. The TOT function limits inadvertent transmission of unnecessary signals, and unwanted battery power consumption (time-out timer function). OFF The TOT time is deactivated. 0.5M - 10.0M (Minutes) Set the transceiver to automatically return to receive mode after transmitting continuously for the set period of time. If the transmission is continued further, the transmission will be automatically stopped to prevent the transceiver from overheating and consequently malfunctioning. If the overheat prevention circuit has operated and then the transceiver returns to the receive mode, turn the transceiver off, or leave it in the receive mode until the temperature falls. Set the receive battery Save Function to "OFF" during packet communication by selecting [48 RX SAVE] (39) in the Set mode. zReception can be interfered with by noise generated from your PC. If the transceiver enters an abnormal receive state, disconnect the transceiver from the PC, and reconnect it to the PC using a photo coupler device or noise filter. zFor details on how to connect TNC to the PC, refer to the TNC instruction manual. Page 341 FT-70DR/DE Advance Manual. 55 TEMP Indicates the current temperature inside the transceiver. Displays the internal temperature sensor "FF" or "CC". Press the [V/M] key to toggle the measurement units between "FF" or "CC". In this setting, press and hold the [F] key to return to normal operation. 56 TOT Set the timeout timer. Set the transceiver to automatically return to receive mode after transmitting continuously for a certain period of time. When using an external power supply, use the external power supply adapter with a cigarette lighter plug (SDD-13) or an external power cable (E-DC-6). Is the battery pack in use exhausted? "CHGERR" appears on the LCD during the charging and the battery pack is not charged after a lapse of 10 or more hours, stop charging the battery pack immediately. Select "WIDE" for normal operation. WIDE Normal transmission modulation level. NARROW The level is half of the normal transmit modulation level. 63\* (62) W-DGID Set the WIRES-X DG-ID number. Set the WIRES-X DG-ID to the same ID number as the node station. AUTO Only open nodes, set to the DG-ID number "00" may be connected. DGID01 - DGID99 Only nodes matching the set DG-ID number can be connected. 64\* (63) MYCALL Setting of the call sign. Input your own call sign set in the transceiver. For more details, see "Inputting the call sign" (Operating Manual). \* USA Version. Page 644 FT-70DR/DE Advance Manual. Clone Operation. Data and various settings saved in your transceiver may be copied to any other FT-70DR/DE transceiver. MIC/SP MIC/SP1. 2.0 S - 5.0 S - 10.0 S (SEC) The signal is received for a specified period of time, and then scanning resumes. BUSY Scanning stops on a received frequency until the signal fades out. If you have some stuff that not is listed here you can donate this by contact mods.dk. When changing the band, press the [BAND] key. VHF (1) 144MHz band 430MHz band UHF (1) AIR band VHF (2) - - - - - 61\* WX ALT (USA Version only) Set the weather Alert Feature. Set the weather Alert Feature, used for notifying storms and hurricanes, ON or OFF. This menu item only appears in the USA Version. OFF Disables the Weather Alert Feature. ON Enables the Weather Alert Feature. 62\* (61) W.N.DEV Set the Transmit Modulation Level. Note that there is a limit to the number of files you can download. 0.1 S - 2.0 S - 5.0 S (SEC) Sets the time for scan to resume after the received signal ends during scanning. For more details, see "Setting the Receive Operation When Scanning Stops" (Operating Manual). 54 SQL.EXP Set the squelch code separately for Receive and transmit. Applies the squelch codes separately for TX and RX or simultaneously for both TX and RX. SPL.OFF Sets squelch codes ("D CODE" / "T DCS" / "D TONE"), separately for TX and RX. SPL.ON Sets squelch codes ("D CODE" / "T DCS" / "D TONE") simultaneously for TX and RX. For more details, see "Selecting the Squelch Type in the Analog FM Mode" (7) Page 542 FT-70DR/DE Advance Manual. VFO.MODE Set the Frequency Selection Range for Operation in VFO Mode. When rotating the DIAL knob to set the frequency tuning range. ALL Tuning continues to the next band when reaching the end of a band. VHF (1) 144MHz band 430MHz band UHF (1) AIR band VHF (2) 108 - 137MHz 137 - 174MHz 174 - 222MHz 222 - 420MHz 420 - 470MHz 470 - 580MHz BAND Tuning continues to the other end of the current band when reaching the end of the band. There is no sound. Is the level of squelch (or S meter squelch) set too high? Press the MONI/T-CALL switch and verify that you can hear white noise. Adjust the level of squelch (or S meter squelch) when receiving a weak signal. Is the volume low? While pressing the VOL key, rotate the DIAL knob clockwise to increase the volume. Is the tone squelch or DCS on? When the tone squelch or DCS is on, the sound is not output until the transceiver receives a signal containing the same tone frequency or DCS code set. Is the C4FM digital mode on? When the AMS function is on, the sound is not output until the transceiver receives a signal containing the Analog FM mode. Also, when the DG-ID function is on and set the DG-ID number to except for "00", the sound is not output until the transceiver receives a signal correspond to the two-digit DG-ID. While pressing and holding the [F] key, turn the each transceivers ON. The "CLONE" is displayed on the LCD, then the transceiver enters the clone mode. 4. Press the [MODE] key on the receiving side transceiver. In this page you find schematic, users and instructions manuals, service manuals, technical supplement, leaf leads and other good stuff. This is the manuals page for Yaesu. The "--WAIT--" is displayed on the receiving transceiver.

FT-70DR FT-70 Original Yaesu 144/430 MHz Digital/Analog Handheld Transceiver - C4FM / FDMA - 3 Year Manufacturer Warranty 4.6 out of 5 stars 274 5 offers from \$218.95 HRO is pleased to announce the introduction of Yaesu's C4FM/FM V/UHF Dual Band 5 Watt Handheld Transceiver - FT-70DR. The FT-70DR is the compact and very attractively priced YAESU System Fusion transceiver; both the conventional FM operation and the advanced C4FM Digital mode are available. The FT-70DR provides up to 5 Watts of reliable RF power, and its large ... A great radio for the money! I have a Yaesu FT-65 and a couple of Baofengs, and the Yaesu FT-70DR is now my daily carry. Easy to program without a computer. I did order a rapid charger and extra battery, but the battery is a little better than expected so far based on other reviews.
